

Reporting results group evaluation

Introduction to Quantitative Ecology

December 6, 2016

Group Members:

1. What three pieces of information are required when summarizing raw numerical data?
2. Name three items that should be provided when reporting results from a statistical test.
3. What are three ways an *insignificant* result can be reported?

4. Describe four attributes that all good graphs should have.

5. See the slide for question 5.
